The eye tests were conducted in three stages and the students who were found to have weak eyesight were prescribed perfectly fitting spectacles with lenses as per their required powers. A database of all the students who had weak eyesight was also created using Google Sheets.

Moreover, each student was counselled along with the parents regarding their eyesight and they were also advised about the importance of wearing spectacles on a regular basis to protect their precious eyes.

The event was a fruitful one as many students benefited from the eye check-up and the timely intervention of the college helped them to focus on their studies in a better manner. The event not only helped to prevent the further deterioration of the eyesight of the students but also provided a sense of relief to the parents.
